

# GOVERNANCE

GCACH maintains an impartial regulator's position in the voluntary carbon market. GCACH is responsible for approving projects and issuing Carbon Token's (CT's /Carbon Credits), overseeing the VVBs accredited under the Program. Advised by its Advisory Board, comprising prominent public/private sector organisations committed to stimulating climate actions in the region, GCACH addresses policy matters. Technical advice is coordinated through the Stakeholder Program Development Committee specific to each program , collaborating with national and international experts on specific areas related to methodology, technology, projects and standards for greenhouse gas reduction. GCACH facilitates the owners of GHG reduction projects through innovative climate finance contributed by project supporters.
